

CONCEPT WORKSTATION, LOW

Concept electric workstation is an ergonomic choice for many uses in industry and education. It is especially good solution for rooms where it is preferred to have

a direct view forward, or to allow natural light to enter the space.

Highlights

Instrument panel

Instrument panel placed directly on the table top for good visibility over the workstation

Ergonomic legs

L-shaped legs for more space under the workstation

Table top

Laminate coated table top is durable in use

Height adjustment

Stepless height adjustment for optimal work position

PRACTICAL DESIGN

Concept workstation stands for practicality above all. A straightforward design with instrument panel located on the table top is easy to adapt and use. Low vertical panel placement gives good visibility over the workstation. This is appreciated for example in training laboratories where it is important to have unobstructed view between teacher and students.

Electric devices are easily available at the hand level. The top of the panel can be used as a practical plane surface.

Modular panel is very easy to adjust for different applications by selecting only needed instrument modules. Panel includes four socket outlets at the rear for powering additional equipment, for example desktop computers or fume extractors.

RELIABLE WORKSTATION

WIDE RANGE OF MODELS

Concept workstation is available in three widths: 1500, 1800 and 2000 mm. For instrument panels, there are models available between widths 900-2000 mm.

Workstation can be equipped with an ESD table top. The frame of the workstation as well as the instrument panel is ESD powder painted as standard.

Optionally, the workstation can be equipped with electric height adjustment or manual height adjustment with a hand crank.

ERGONOMIC AND RELIABLE WORKPLACE

An ergonomic and comfortable workplace is a result of good designing in different parts of the workstation. In **Concept workstation**, great ergonomics shows among others in the following details:

- All instruments within workers sight and hand reach
- Stepless height adjustment for optimal working position
- L-shaped legs for plenty of space under the workstation
- Storage units and stands available for placing tools next to the workplace

Concept workstation is also very stable and robust with load capacity of 500 kg. A strong body together with a laminate coated table top ensures a long lifetime for the workstation.
